Please elaborate on your previous response:

- Even when there were technical issues and our lessons didn't go quite as planned, the professor was easily adaptable and still gave us as much knowledge as he could.

It is not possible to capture every nuance of effective teaching in a short survey. In the box below, please describe things your instructor did that were especially effective in helping you learn the material.

- He told us why we were learning the material which is really rare nowadays.
- Presentations
- I really appreciated the focus on learning over memorizing. The professor would give us formula sheets on the exam and this was very beneficial in helping us focus on learning the concepts and understanding what we were doing, rather than memorizing formulas. I also really loved how he would let us try problems out before showing us how to do them. This helped me critically think about how to arrive to an answer before just being told/copying this. It helped me to really learn how to do the work.
- Nicest teacher, has a more deverce way of teaching that I havent experienced before, would take another class from this professor.
- Professor he will explain every detail of the knowledge, and publish the Zoom video and Excel table on the canvas, even if you forget it, you can check it at any time you want.
- Some of the material was hard to follow. Professor He provided additional videos that were recorded by another professor literally saved me with the excel portion of this course I also appreciated that he went over examples that were in the text. And lastly his patients and understand were both appreciated. Both of the additional materials and his attitude towards teaching and helping students helped me learn more and were very beneficial.
- Wonderful professor! Professor He is amazing and dedicated to the learning outcomes of his student. The course was perfectly designed and Professor He worked to engage with all students and help them reach their potential in the course. One of the best professors that I have had at SUU. He should be a tenured Professor!
- Giving real world examples and explaining how to do it by hand and by excel
- I like how Dr. He would immediately update the leaning objectives and table of contents before and after each class. It made it so that when I wanted to go back to an in class example, the excel file was right there. I liked the structure of the class, the textbook was very helpful.

- I really appreciated how flexible you were with accommodations and trying to work with us. I loved the personal aspect of your teaching where you would say hi outside of class and make sure we knew that we were known and seen in your class. This class was definitely one of my favorites because of the professor. I don't really like economics but Professor He made it fun and interesting.

What were the most beneficial aspects of the course?

- Practicality of using excel
- Welcoming Understandind
- The teaching style and humor were definitely important parts in making this course fun and relatable. It was really good how he approached new subjects and made sure we felt comfortable in the class.
- How much we learned about excel
- mathematics thinking
- The professor and the additional videos that were provided.
- The usage of Excel in learning the Quantitative methods was extremely helpful and will be beneficial in the long run. Professor He had high expectations and helped his students achieve.
- Apply math to business' models and decisions
- review sessions, slides, textbook.

What is one thing you would change about the course to improve the learning experience?

- Have more examples.
- Nothing
- I wouldn't change anything about this course. It was honestly one of my favorites I have ever taken and the professor made the entire experience enjoyable.
- Smaller assignments, spread out in a daily format.
- Professor He's pronunciation. However, I don't think this is a problem, sometimes strange pronunciation can arouse students' interest and attention.
- I would say hat I did not really understand how the material I was learning related to business and the real world. I would have liked to have some more examples of how real life business might use what we learned.
- Nothing, great course!
- Having the examples be like the ones in the homework
- n/a
